DETAILED ACTION

Allowable Subject Matter

Claims 1-27 are allowable over the prior art of record.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: Applicants have claimed the following uniquely distinct features in the instant invention which are not found in the prior art, either singularly or in combination.

1. Regarding claim 1 - A method of processing a telephone call from a calling station to a called station that is busy as a result of having established a connection to a data network via an enhanced telephone switching system, said method comprising the steps of receiving said call at said enhanced telephone switching system and responsive to said called station being busy, sending a message to said called station via said connection to said data network to alert a subscriber at said called station to the receipt of said call, and connecting said calling station to said called station via said connection to said data network so that a caller at said calling station may communicate with a subscriber at said called station.
2. Regarding claim 15 - A method of processing a call waiting feature for a first telephone station set whose telephone line is connected to the Internet comprising the steps of responsive to receiving at an enhanced telephone switching system, an initial call from said first telephone

station, extending a connection from said first telephone station to said Internet, receiving a voice call from a second telephone station directed to said first telephone station, and, responsive to said first telephone station being connected to said Internet, sending a data message via said connection to said first telephone station to alert a subscriber to receipt of the voice call from said second telephone station, and bridging a connection to said second telephone station with the connection between said Internet and said first telephone station so that a caller at said second telephone station may communicate with said subscriber at said first telephone station.

3. Regarding claim 26 - A method of processing a three-way calling feature for a first telephone station set whose telephone line is connected to the Internet, comprising the steps of responsive to receiving at an enhanced telephone switching system an initial call from said first telephone station, extending a connection from said first telephone station to said Internet, receiving a voice call from a second telephone station directed to said first telephone station and, responsive to said first telephone station being connected to said Internet, sending a data message via said connection to said first telephone station to alert a subscriber to the receipt of the voice call from said second telephone station, and bridging a connection to said second telephone station to the connection between said Internet and said first telephone station so that a caller at said second telephone station may communicate with said subscriber at said first telephone station, then responsive to receiving a voice call from a third telephone station directed to said first telephone station while said first telephone station is connected to said second telephone station, bridging connections to said second telephone station and said third telephone station to a three-way conference circuit, and bridging said three-way conference circuit to the connection between said Internet and said first telephone station.

The closest prior art, either singularly or in combination, fail to anticipate or render the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Claims 1-27 being allowable, **Prosecution On The Merits Is Closed** in this application.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Pezzlo whose telephone number is (571) 272-3090. The examiner can normally be reached on Monday to Friday from 8:30 AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hassan Kizou, can be reached on (571) 272-3088. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571) 272-2600.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C.

Art Unit: 2662

or faxed to:

(703) 872-9306

For informal or draft communications, please label "PROPOSED" or "DRAFT"

Hand delivered responses should be brought to:

Jefferson Building

500 Dulany Street

Alexandria, VA.
